## ENZ NOZZLES AVAILABLE AT GREAT PRICES

### ENZ BULLDOG ANTIBLAST P/N: 600080

The ENZ Bulldog Antiblast Nozzle is specifically designed to prevent blowing toilets while jetting in residential areas. Often, blown toilets are from negative pressure arising ahead of the nozzle if installations are not correct or venting is not working properly. To prevent this disaster, trust ENZ Nozzles to get the job done right. The ENZ Nozzle works with 6" to 23.5" pipe.

### ENZ GRENADE BOMB P/N: 40100

For pipes with a large volume of debris, trust the ENZ Grenade Bomb to get the job done. Because of its heavy-weight nozzle, the ENZ Grenade Bomb is kept at the bottom of the pipe, where it can easily disperse mud, sludge, or any other blockages. This nozzle is great for long distances because the rear jets give it thrust to get up the pipeline.

### ENZ BULLDOG ANTIBLAST P/N: 600100

With 4-5 strong concentrated forward jets and the sharp cutting edges, the Chisel Point Nozzles will tear through almost any kind of blockage. Perfect for opening root masses or frozen pipelines.

### ENZ BULLDOZER P/N: 50100G

The ENZ Bulldozer Nozzle is a heavy nozzle for cleaning the bottom of pipes or channels between 200mm to 3m in diameter. This nozzle is ideal for the removal of silt, gravel, sand, and rubble.
